Response to Amendment/Arguments

1. This action is in response to Applicant's amendment/arguments in paper dated 6/5/2006.

Based on the applicant's persuasive arguments, art rejection is withdrawn.

Applicant's argument with respect to rejection under 35 USC is not persuasive. Claiming a recording medium having recorded thereon information of images is non-statutory because it is non-functional.

Furthermore there is pending issue of obviousness type double patenting.

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claims 1-12 are rejected under 35 USC 101.

Regarding independent claim 1, claim in lines 1-2 recites "A recording medium having recorded thereon information of images which have been coded by performing motion compensation". Claiming a recording medium having recorded thereon information of images is non-statutory because it is non-functional. Claim 2-4 are dependent on rejected claim 1 therefore they are also rejected.

Regarding independent claim 5, claim in lines 1-2 recites "A recording medium having recorded thereon information of images which have been coded by performing motion compensation". Claiming a recording medium having recorded thereon

Art Unit: 2624

information of images is non-statutory because it is no-functional. Claim 6-8 are dependent on rejected claim 5 therefore they are also rejected.

Regarding independent claim 9, claim in lines recites "A recording medium having a machine-readable program recorded thereon, the program causing the machine upon implementation to record information of images which have been coded by performing motion compensation". A recording medium having a machine-readable program recorded thereon, the program causing the machine is non-statutory because recording medium can be piece of paper. It should recite A computer readable medium recording having a computer-readable program recorded thereon, the program causing the machine. Furthermore Claiming a recording medium having recorded thereon information of images is non-statutory because it is no-functional. Claims 10-12 are dependent on rejected claim 9 therefore they are also rejected.

Double Patenting

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to

Art Unit: 2624

be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1, 5 and 9 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6,868,185.

Although the conflicting claims are not identical, they are not patentably distinct from

each other because claim 1, 5 and 9 of the instant application and claim of the U.S

Patent recites similar limitation of A recording medium having recorded thereon

information of images which have been coded by performing motion compensation,

wherein the information includes rounding method information specifying a positive

rounding method or a negative rounding method for interpolation of intensity values of

pixels in performing the motion compensation. The only difference between claims 1, 5

and 9 of the instant application and claim 1 of the U.S Patent is that claims 1, 5 and 9 of

the instant application are broader than claim 1 of the U.S Patent.
